Acknowledgements

Introduction

1. Gross-Stark conjecture

2. Cohomological interpretation

3. Hilbert Modular forms

4. Λ -adic forms for Hilbert modular forms

5. Galois representations

6. Work of Dasgupta-Kakde-Ventullo

7. Stark's conjectures

A. Algebraic Number theory

B. Higher Ramification groups

C. Representation theory

D. Artin conductors and Artin L-functions

E. Local class field theory

F. Global class field theory
